

- ADA Compliant
- 1-1/2" NPT Inlet Connection
- All units factory tested for proper operation

Specifications

Materials

All cabinet materials, including interior piping are Type 304 stainless steel. The fixture is made from heavy gauge stainless steel with seamless welded surfaces.

Construction

All welded construction with exposed welds ground smooth, and all accessible seams and voids eliminated. Fixture will withstand up to 5,000 lb. load on front area of toilet (certified test results of such loading are available upon request). Waste outlet is a nohub connection. Elongated die-drawn bowl has siphon jet action for positive flush. 30 PSI (flowing into flush valve) required for flushing. A 1.6 gallon-per-flush (low-flow) toilet is standard. Toilet assembly meets ANSI/ASME A112.19.2.

When choosing the Floodbuster option, a minimum of 35 PSI flowing into the Floodbuster valve is required.

Flush Valve

Flush valve is not included as standard equipment with the unit. Flush valve included when specified.

Finish

All exposed steel surfaces to have a bead blast finish (optional #4 satin polished finish, integral contoured seat polished to option #7 sanitary finish). Hinged plastic seat is white.

Wall Anchoring

No exposed mounting faster ers in call are prixture is completely secured from pipe chase side, with rust-resistant mounting nardware for walls up to 12" thick.

Fixture requires war openings and accessible chase for installation and in intenante. Some field assembly may be required.
