

Specifications

Wherever flush valves are exposed to secured areas, Bradley recommends the Model 7905 flush valve with vandal-resistant cover.

Materials

Cover is heavy gauge Type 304 stainless steel. Flush valve is cast bronze with a polished chrome-plate.

Construction

Flush valve has a polished chrome-plate, cast bronze body. Supply connection is a 1" NPT and tailpiece is for a 1-1/2" NPT male spud on fixture. Valves have code approved vacuum breaker and union angle check stop. All exposed surfaces of cover are polished to a #4 satin finish. Cover is secured to wall with tamper-resistant screws. 1/4" wall anchors for attaching cover to wall are furnished by others.

Standard Equipment

Chrome-plated valve, tailpiece, box cover and tamper-resistant screws. Wall anchors and supply piping by others. Push button must be roughed exactly as shown in diagram; cut supply nipple to fit.
