Model 2491 — Surface-Mounted

Roll Paper Towels
Lever Operation

Product Materials

Capacity
One 8” or 9” wide paper towel roll and one partial (stub) roll.

Operation
Lever-operated dispensing mechanism will provide an adjustable means to dispense a nominal 5 inches, 4 inches or 2½ inches of toweling per lever stroke. Toweling will only be dispensed with the downward stroke of the lever.

Installation
Verify all rough-in dimensions prior to installation. Secure to wall using convenient mounting slots and appropriate mounting devices.

Guide Specification
Cabinet sides and back shall be fabricated from 20 gauge steel, with 18 gauge steel on top, pre-treated and finished with a baked enamel. The door will be transparent and the throat an opaque high impact plastic. The front cover shall be fabricated of smoked transparent high-impact plastic.

Cabinets shall have a lever-operated dispensing mechanism. The operating lever is to be located on the front of the dispenser.

Cabinet will be provided with a key activated spring lock, which can easily be converted to push-button operation. Each cabinet will be provided with key and push-button.

Cabinets shall include a transfer system which automatically starts feeding the paper web of the top roll when the lower roll is nearly depleted.

The drive mechanism, transfer system, roll holders and door shall be field replaceable.

Overall dimensions: 12”W x 15”H x 10½”D.
